I. Course Description

This course addresses core concepts in biology, including the Cell, Genetics, Evolution, Biodiversity, Ecology, and Conservation/Sustainability. For non-majors. 3 credits.

II. Course Meetings

First day of classes: 12 May 2014
Last day of classes: 20 June 2014
Final Exam: None

This course is entirely online, with weekly deadlines, but no fixed meeting times. Students may work on course material at their own pace, from any location with a functional internet connection, as long as it is completed by the deadline.

III. Instructors

Course Instructor:

Dr. Nicole Gerlach
Department of Biology
Office: 520 Carr Hall
E-mail: ngerlach@ufl.edu

Teaching Assistants:

Mr. Richard Hodel
Sections: 01A8, 03CA
Department of Biology
E-mail: hodel@ufl.edu

Mr. Mark Sandfoss
Sections: 0355, 01GA
Department of Biology
E-mail: mrsandfo@ufl.edu

All office hours are by appointment only.

IV. Course Communications

A. Course Website: http://lss.at.ufl.edu (select Canvas)

B. Contacting Your Instructors: If you have a question about course mechanics or course material that cannot be answered from the syllabus, course announcements, or the course FAQ, please post it to the Discussion Boards on Canvas. If you have a question involving a personal/grade-related issue, please e-mail the your TA or Dr. Gerlach, as appropriate. All e-mail correspondence must originate from your ufl.edu account, have your full name in the body of the e-mail, and contain “BSC 2009” in the subject line. E-mails not meeting these requirements may not be recognized by our e-mail filters, and thus may not be answered. Barring unusual circumstances, expect a reply within 24 hours during the week, and 48 hours
over the weekend. E-mails and Discussion Board posts are checked at least once per day, but sometimes not more than that.

C. Communications From Your Instructors: Each student is solely responsible for reading and following the instructions, guidelines and schedules in this syllabus and on the course webpage. Not having read the information in this syllabus, on the webpage, or in course announcements will not constitute an excuse for missing deadlines, assignments, or other assessments. Please set your preferences in Canvas so that you receive notifications of course announcements and other information.

V. Course Resources

A. Textbook

*Biology for a Changing World, 1e* by Shuster, Vigna, Sinha, and Tontonoz.

An electronic version of the textbook is included with BioPortal access (see below). A hard-copy version of the textbook is not necessary for the course.

B. BioPortal: Online Resources and Electronic Textbook

*BioPortal* is an online assignments and tutorial system from the textbook publisher that will be used for required readings, interactive activities, and quizzes. BioPortal is required for this course and includes the electronic version of the textbook. Go to [http://courses.bfwpub.com/sabiology.php](http://courses.bfwpub.com/sabiology.php) to register and purchase access to BioPortal OR you can purchase an access card at the UF Bookstore. When setting up your account, **you must use your Gatorlink (ufl.edu) e-mail address, which will be your username.** Using an e-mail address other than your UFL e-mail address will result in you receiving NO credit for all assignments administrated through BioPortal.

For help with BioPortal, contact BioPortal Technical Support: 1-800-936-6899 (phone) or techsupport@bfwpub.com (e-mail).

BioPortal grades will be transferred to the Canvas gradebook periodically, but will also be viewable at any time on the BioPortal website.

C. Course Website (Canvas)

All class material - including the syllabus, lectures, assignments, discussions, quizzes, and gradebook – that is not part of the BioPortal system will be posted on the course Canvas website ([https://ufl.instructure.com](https://ufl.instructure.com)). For help with Canvas, call the UF Computing Help Desk at 352-392-4357, or visit the e-Learning support website: [http://help.instructure.com/](http://help.instructure.com/).

D. Course Fee

For UF students, the course fee is $3.00. For UFO students, this fee is included in tuition.

E. Course Materials

Some activities will require students to acquire additional inexpensive materials for “kitchen experiments”. These include: raisins, salt, rubbing alcohol, and a coffee filter.

VI. Course Policies

A. Time Commitment

The UF College of Liberal Arts and Sciences assumes that each student will devote 3-4 hours per week per
credit-hour to each course during the regular semester. Because BSC 2009 is 3 credits, each student should therefore expect to devote 9-12 hours per week to this course in a 15-week semester. During the accelerated 6-week summer session, students should expect to devote **22-30 hours per week** to this course.

B. **Attendance**

Students are expected to complete all assigned work (quizzes, interactive, discussions, activities etc.) by the due date. Unavoidable circumstances (e.g. hospitalization or family emergencies) that prevent you from completing your work in a timely manner require you to obtain a letter from Dean of Students office (https://www.dso.ufl.edu/home/contact-us) and submit it to your instructors as soon as possible. Otherwise, manage your time wisely and work ahead when you need to. We will not be sympathetic to “we didn’t get back from (activity) when planned and I didn’t have time” or “my computer crashed half an hour before the deadline and tech support wasn’t open that late at night.”

C. **Computing Requirements**

It is the responsibility of the student to maintain a functioning computing system and internet connection. Computing/internet connectivity issues will NOT be acceptable excuses for missed deadlines unless they are brought to the attention of the instructor at least 48 hours prior to the deadline and accompanied by the ticket number from technical support. See section VIII, below, for Technical Support contact information.

D. **Late Work**

Late work will be accepted up to 1 week past the due date. Work submitted up to 3 days late will receive a 50% deduction. Work submitted up to 1 week late will receive a 75% deduction. After 1 week you will receive a zero. BioPortal activities automatically close at the deadline and cannot be made up without an excused extension from the Dean of Students or a technical support trouble ticket documenting issues with BioPortal for at least 48 hours prior to the deadline.

Note that the last Friday of the semester (20 June) is the last day on which any work can be submitted for credit; no late work will be accepted for the last set of modules.

E. **Resubmissions**

Quizzes within both Canvas and BioPortal are graded on the first attempt; please do not start these quizzes until you are ready to complete them. For assignments within Canvas that require a file upload, these may be resubmitted multiple times; we will only consider the most recent submission. However, once a submission has been graded, even if it is prior to the deadline, no further submissions will be considered.

F. **Classroom behavior**

Behave with courtesy towards your fellow students and the instructor. This is particularly important in discussion sections where you are voicing opinions and commenting on the views of other individuals. Students who persist in being discourteous/rude will be blocked from participation (with subsequent loss of points).

G. **Office Hours**

Office hours for this course are by appointment only, and may be conducted via Skype or a similar service. We cannot meet with students on a drop in basis.

H. **Grammar**

Correct grammar, punctuation, spelling, capitalization and paragraphing should be used in any college level submission, including the discussion boards. We will take note of spelling and grammar and we will grade accordingly. U SHLD NT US TXT SPEAK LKE IDK OR BFF THX ALSO DNT USE CAPS. Ugh.
VII. UF Policies

A. Academic Honesty
All students registered at the University of Florida have agreed to comply with the following statement:

“I understand that the University of Florida expects its students to be honest in all their academic work. I agree to adhere to this commitment to academic honesty and understand that my failure to comply with this commitment may result in disciplinary action up to and including expulsion from the University.”

In addition, on all work submitted for credit the following pledge is either required or implied:

“On my honor I have neither given nor received unauthorized aid in doing this assignment.”

Cases of plagiarism or other academic dishonesty will not be tolerated, and may result in grade penalties or other sanctions. If you have knowledge of any instances of academic dishonesty in this class, please notify the instructor or contact the Student Honor Court (392-1631) or Cheating Hotline (392-6999). For additional information on Academic Honesty, please refer to the University of Florida Academic Honesty Guidelines at: https://catalog.ufl.edu/ugrad/current/advising/info/student-honor-code.aspx#honesty.

B. Accommodations for Students With Disabilities
Students who will require a classroom accommodation for a disability must contact the Dean of Students Office of Disability Resources, in Peabody 202 (phone: 352-392-1261). Please see the University of Florida Disability Resources website for more information at: http://www.dso.ufl.edu/drc/. Note that the student should provide documentation of a requirement for accommodation by the second week of classes. No accommodations are available to students who lack this documentation, and accommodations are not retroactive. It is the policy of the University of Florida that the student, not the instructor, is responsible for arranging accommodations when needed. Once notification is complete, the Dean of Students Office of Disability Resources will work with the instructor to accommodate the student.

C. Drop/Add/Withdrawal
A student can drop/add during the drop/add period with no penalty. After drop/add, a student who drops will receive a W until the date listed in the academic calendar. After that date, the student may be assigned an “E” (fail). Note: it is the responsibility of the STUDENT to withdraw from a course, not the instructor. Failure to participate/complete the class is NOT a drop.

D. Teacher Evaluations
Anonymous course evaluations will be open via UF’s online evaluations system (https://evaluations.ufl.edu) near the end of the semester; you will receive e-mail notifications of when the evaluations open. Additionally, CITT (Center for Instructional Technology & Training) may also solicit separate anonymous evaluations of the course.

VIII. Getting Help

A. Computing Problems
For issues with technical difficulties in Canvas, please contact the UF Help Desk at:

- Learning-support@ufl.edu
- (352) 392-HELP - select option 1
- https://lss.at.ufl.edu/help.shtml

For issues with BioPortal, please contact BioPortal technical support at:

- 1-800-936-6899
- techsupport@bfwpub.com
B. University Support Services
College can be a very stressful time in a person’s life. Resources are available on campus to help students meet academic goals and solve personal problems, which may interfere with their academic performance. If you find that you are having difficulty emotionally or academically, there is substantial support available. See “A Self Help Guide for Students” or contact on of the following services:

1. UF Counseling and Wellness Center, Radio Rd Facility, 392-1575
2. Dean of Students Office, 202 Peabody Hall, 392-1261
3. Career Resource Center, Reitz Union, 392-1601
4. CLAS Academic Advising Center, Farrior Hall, 100 Fletcher Drive, 392-1521

C. Other Questions
If you have non-tech-support questions about other aspects of the course, check the following sources first to see if it is already answered, before e-mailing your instructors:

- Course Syllabus
- About Canvas / About BioPortal / About Modules / Start Here pages
- Course Announcements (this is the primary means that your instructor has to communicate with you in a timely manner)
- Course FAQ or Module-specific Questions Discussion Boards

If you still cannot find the answer to your questions:

- If it is a question that others might find useful to know the answer to as well, post it to the discussion board – either the Discussion Board for the particular unit for questions on course topics, or the general Discussion Board for questions about course mechanics.
- If it is a question specific to you (e.g. account or grade specific), contact Dr. Gerlach or your TA via e-mail.

IX. General Education

A. General Education Classification
BSC 2009 meets the general education requirements for Biological Sciences.

B. Program Area Objectives
Biological science courses provide instruction in the basic concepts, theories and terms of the scientific method in the context of the life sciences. Courses focus on major scientific developments and their impacts on society, science and the environment, and the relevant processes that govern biological systems. Students will formulate empirically-testable hypotheses derived from the study of living things, apply logical reasoning skills through scientific criticism and argument, and apply techniques of discovery and critical thinking to evaluate outcomes of experiments.

C. General Education Student Learning Outcomes
The general education student learning outcomes (SLOs) describe the knowledge, skills and attitudes that students are expected to acquire while completing a general education course at the University of Florida. The SLOs fall into three areas: content, communication and critical thinking.

1. Content: Students demonstrate competence in the terminology, concepts, methodologies and theories used within the discipline.
2. Communication: Students communicate knowledge, ideas, and reasoning clearly and effectively in written or oral forms appropriate to the discipline.

3. Critical Thinking: Students analyze information carefully and logically from multiple perspectives, using discipline specific methods, and develop reasoned solutions to problems.

D. General Education in the Context of This Class
Each module will contain between 1-3 activities worth between 10 and 30 points each; this represents approximately 35% of the final grade. The purpose of these activities is to encourage students to think about Biology outside the framework imposed by the textbook or instructor lectures by giving them the opportunity to develop their own materials to support or reject existing scientific hypotheses. Hypothesis testing is most explicitly addressed in the first module, on the scientific method. Students will gain practice formulating hypotheses and analyzing experimental data throughout the class, in various activities that involve virtual and/or “kitchen” experiments. Activities that include an emphasis on hypothesis testing are marked on the schedule below with ‡.

For each activity, students are provided with specific instructions for completing the activity and a grading rubric. The grading rubrics are designed to evaluate the student’s mastery of specific content and their ability to produce bodies of work within the guidelines specified in the instructions. Some examples of activities types include: research using reliable web sources, expository writing, video reviews, “kitchen experiments”, inquiry activity sheets, and construction of figures and tables.

The course also includes nine discussions, in which students answer an open-ended discussion prompt regarding the ethics and application of biology in daily life. Students will be expected to provide a thoughtful answer to the initial prompt, as well as to respond to the answer of at least one of their classmates, in order to foster critical thinking skills within a learning community.

X. Assessments and Grading

A. Course Structure and Due Dates
This course is divided into fifteen modules. During the summer session, two or three modules will be due each week. Modules open for work on the Monday of each week, and all materials except your first discussion board post (see below) are due by 11:55 pm the following Sunday. There are two exceptions:

• The first set of modules has a little more time to accommodate registration and set-up, although the second set of modules follows the normal Monday – Sunday schedule
• The final set of modules will be due by 11:55 p.m. on the last Friday of class to accommodate the schedule of when final grades are due to the registrar. No late work will be accepted after this deadline. These modules will open early to allow you sufficient time to complete them; please plan your time wisely!

The due dates for each unit are listed on the last pages of the syllabus, and will also be listed on each module’s page within Canvas.

The deadlines are all at 11:55 p.m. The Canvas and the BioPortal systems will both close you out of a quiz if you pass the deadline while you are taking a quiz; please do not wait until the last minute to begin!

B. Coursework
Each unit will consist of various materials to read/watch, activities to complete, and quizzes to take. All required activities and assignments for each unit (including those in BioPortal) will be listed on that module’s page on Canvas. The various pieces that might be included in a unit are outlined below. The activities vary in how many points they are worth but each unit is worth ~85-100 pts overall.
1. **BioPortal (~40% of total points)**
   a. **Read the chapter(s).**
   b. **Interactive infographics.** There are typically 3-4 per chapter, worth 2 points each when completed.
   c. **Learning Curve:** These are adaptive quizzes, where the questions get harder or easier depending on how you do. You’re not penalized for getting questions wrong, but you need to reach a certain level of question for each unit. Once you reach that level, you receive full credit (10 pts) for the unit. After that point, you can continue answering questions to review the material without affecting your score.
   d. Take the **Chapter quiz** over the reading; typically worth 18-30 pts.

2. **Canvas (~60% of total points)**
   a. Watch the **lecture videos.**
   b. **Discussion posts.** Some units have a discussion topic worth 10 points; 6 points for your initial post addressing the discussion prompt, which is due three days before the rest of the material (i.e. 11:55 p.m. Thursday for a module due 11:55 p.m. Sunday), and 4 points for your reply to one (or more!) of your classmates’ posts (due with the rest of the course materials at 11:55 p.m. on Sunday). Discussion board posts should be about a paragraph long (minimum 3-4 sentences) and should be composed of logically and syntactically valid sentences.
   c. **Activities.** These are activities that will ask you to read something, watch something, do something, or write something related to the topic of the unit. There are two types of activities in this course, based on how you get credit for them.
      i. The first type requires you submit your work (a short essay, a completed worksheet, etc.) by uploading it to the corresponding Assignment in Canvas.
      ii. For the second type, instead of submitting your completed work, you will use it to answer questions about the activity on the corresponding quiz on the Quizzes page in Canvas.
      iii. In some units there are worksheets linked from the Unit’s page that don’t have assessment questions or anything to submit, but material from these assignments will appear on the Lecture Quiz.
   d. **Lecture Quiz.** These quizzes cover material from the entire unit, with a focus on the lecture material.

**Recommended Order:** You can complete the various assignments for each unit in any order that you want, as long as they are all complete by the due date. However, I would recommend reading the chapter, watching the lectures, and completing the infographics first; answering the discussion prompt, doing the learning curve quiz, and completing the assignments second; and completing the chapter quiz (on BioPortal) and the lecture quiz (on Canvas) last, once you are confident with the material.

**C. Grading**

Grades from assignments, discussions, and lecture quizzes will be posted on Canvas throughout the semester. Grades from BioPortal will be accessible throughout the course on the BioPortal gradebook, but will only be transferred to the Canvas gradebook periodically. Please take this into account when looking at the Canvas gradebook! It is the responsibility of the student to check their grades on Canvas and to let instructors know about discrepancies within one week of the grades being posted.

Minimum grade cutoffs are listed below. The scores for the course as a whole will not be curved (i.e. these grade cutoffs will not be lowered) except under extremely rare circumstances (i.e., unless we tell you otherwise these cutoffs will not be lowered, so do not ask). However, these cutoffs will not be raised; in other words, if you receive 93% of the possible points, you are guaranteed to earn an A grade. Final scores will NOT be rounded (i.e., 89.9% is not 90%).

</tr>
</tbody>
</table>

Note that the current UF policy for assigning grade points is available at the following undergraduate catalog web page: https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx.

D. Incomplete("I"): If a student has completed the majority of the course work and particular DOCUMENTED circumstances prevent completion of the course in the time allotted, the student may, with the agreement of the instructor, be assigned an “I” pending resolution of the grade. All incompletes MUST be resolved by the end of the following term or the student will receive a grade of “E” (failing).

E. Extra Credit
No mechanisms for extra credit are available.

F. Special Treatment
Please do not request individual special treatment regarding grading at the end of the semester; we do not adjust grades for individuals for any reason. Plan to do well on all quizzes and other assignments from the beginning of the semester; if you are having difficulty in the class, please let your instructors know sooner rather than later.

XI. Disclaimer
This syllabus represents the current plans and objectives; however, schedules, requirements, and assignments may change throughout the semester as the need arises. Such changes, communicated clearly, are not unusual and should be expected.
## XII. Weekly Course Schedule

Note: This schedule is subject to change; the most up-to-date listing of the required assignments for each module will be found on that module’s webpage.
