COURSE DESCRIPTION:
This course examines the history of evolutionary thinking from the Enlightenment to the present. In addition to examining the development of scientific ideas concerning evolution, the course also examines the lives of critically important individuals like Charles Darwin and Alfred Russel Wallace, and the varied sociopolitical and national contexts of evolutionary science, especially in the nineteenth and early twentieth centuries. The course also focuses on contemporary debates pertaining to evolution and its teaching in American high schools and on the complex relations between evolution and American popular culture. Following historical discussion, the recent status of evolutionary science is examined in historical context.

REQUIRED TEXTS:
2. Charles Darwin, Voyage of the H.M.S. Beagle, Penguin Classics
2. Edward Larson, Summer for the Gods
3. Edward Humes, Monkey Girl: Evolution, Education, Religion and the Battle for America’s Soul
EVALUATION:
Course evaluation follows the organization of the course. There will be two in-class exams, and one take-home final essay worth 30% respectively. Students are expected to attend lectures, films, and complete all reading assignments in time for class. Students are allowed two legitimate absences only. The final 10% of the grade is based on class participation including attendance. Please note: the textbook serves as a supplement to the lectures. Students are expected to do all readings assigned, but will not be examined directly from the textbook (Bowler) for any of the in-class examinations. The final take-home essay will be based on both lectures and the readings assigned as well as any films or resources shared with the class. Exam format includes short answers, matches, and longer essays. Make-up exams are not encouraged, but possible, given sufficient explanation (e.g. physician’s note) for absence.
