Islands are renowned for their extraordinary biota—inspiring biologists and providing key insights into evolution, ecology, biogeography, and conservation.

Come learn about what makes island biota weird and wonderful while living on an island within the Cedar Keys National Wildlife Refuge for 10 days. Students will gain valuable field research experience as we explore pristine natural habitats on Seahorse Key and other nearby islands.

**Credits:** 3  
**Class Size:** 14  
**Lab fee:** $400*  
(*does not include tuition & food)  
**Pre-trip orientation meeting required**  
**Course Instructor:** Dr. Coleman Sheehy (coleman3@ufl.edu)
