

BSC 2005L Biological Sciences Lab for Non-Majors (online) – Summer C 2020

Coordinator of Labs: Kent A Vliet, Ph.D., kvliet@ufl.edu

Office hours: Wednesday & Thursday 9:30-11:00 am and by appointment: online- <https://ufl.zoom.us/j/4336756706>

Instructors:

NAME	EMAIL	Sect. No.	Course No.
Becker, Anna	becker.a@ufl.edu	7450	16850
Catlin, Nathan	ncatlin@ufl.edu	74H6	10587
Koeller, Krista	kkoeller3115@ufl.edu	74H7	10588
Polvadore, Trey	polvadore@ufl.edu	74H5	10589
Sparks, David	david.sparks@ufl.edu	7H48	16700
Whelpley, Jessica	jwhelpley@ufl.edu	7H49	10590

Pre(co)requisite

Officially, BSC 2005. However, any biology course, including high school biology and access to a biology text will be adequate.

Course description

The amazing intricacies and complexities of life tend to obscure basic underlying relationships among all living species. This course attempts to elucidate the principles of biological organization and function that tie together seemingly unrelated forms. The tendency of species to change over time (i.e. evolution) will provide the bases of our approach to interpreting biological phenomena. Biological principles will be examined at all levels, from cellular to organs and organisms, and from populations to communities and ecosystems. Attention will be paid to the relationships between structure (anatomy) and function (physiology) at all levels of organization.

This is a hands-on laboratory, even though it is online. This means that students will be using the best available tools both online and offline, to understand biological principles through an interactive approach. The course material is divided into 4 units and each unit is subdivided into modules where each module corresponds to a course objective that is designed to be taught over a one-week period. Each module consists of 3 assignments: 1) readings, 2) virtual, hands-on or blended activities, and 3) collaborative activities. This will be further explained in this syllabus.

Objectives

General: With this laboratory, students will obtain a hands-on introduction to living systems, including an understanding of the scientific method, cell structure and function, genetic mechanisms, evolutionary processes, human anatomy and physiology, ecology and the nature of science.

Specific per modules/weeks:

UNIT (1): INTRODUCTION

Module 1.1. The students will understand the objectives of the course, activities, assessments and the technologies.

Module 1.2. The student will be able to describe the scientific method.

UNIT (2): CELLS, GENETICS AND EVOLUTION

Module 2.1. The student will be able to describe the main organelles of cells, their functions and the phases of cell division.

Module 2.2. The student will be able to describe the characteristics and function of DNA and complete the process of extraction.

Module 2.3. The student will be able to describe the general principles of genetics.

Module 2.4. The student will be able to describe the general principles of evolution.

UNIT (3): ECOLOGY

Module 3.1. The student will be able to describe the principles of population ecology.

Module 3.2. The student will be able to describe the main ecological interactions.

Module 3.3. The student will be able to debate the human impact on global ecology.

UNIT (4): ANATOMY

Module 4.1. The student will be able to perform a pig dissection.

Module 4.2. The student will be able to identify the main organs of the circulatory, respiratory and digestive systems.

UNIT (4): ANATOMY (OPTION 2)

Note: This option is only available if the student can't perform a pig dissection due to religious reasons.

Module 4.1. The student will be able to describe the principles of sensory physiology.

Module 4.2. The student will be able to identify the main organs of the circulatory, respiratory and digestive systems.

Teaching Philosophy

The design and teaching of this course is grounded in the theoretical framework of community of inquiry. Accordingly, it supports connection and collaboration, creating an environment that enhances reflection, discourse, critical thinking and meaningful learning. In this course, we *blend* the best online resources with the best traditional hands-on technique. We also incorporate social, cognitive, and pedagogical principles; and take into consideration student-centered learning theories.

Reading assignments

For every module/objective/week, you should read one or more book chapters from the textbook, and/or an interactive reading specially developed to cover a particular subject.

Required material

eBook: BioPortal for Scientific American Biology for a Changing World. Author: Shuster, Michelle (Third Edition)
<http://www.macmillanhighered.com/launchpad/sabiologyphys3e/10721062> (Links to an external site.)

Laboratory kits from Carolina Biological - <http://www.carolina.com/distancelearning/201501-uf-bsc20051>
(Links to an external site.)

- This will include the Strawberry DNA extraction Kit and the Fetal pig dissection Kit.
- You will need to purchase your own strawberries for the Strawberry DNA Lab.
- You are able to purchase kits without the fetal pig if it is against your beliefs. You will still be responsible for completing an alternative assignment.
- Digital camera, smart phone or your computer to take photos and record video.
- Headsets and microphone for the online debate.

Course Schedule and activities

Lab	Start	End	Subject
0	May 11	May 20	Module 1.1: Start Here
1	May 17	May 24	Module 1.2: Scientific Method
2	May 24	May 31	Module 2.1: Cells
3	May 31	June 7	Module 2.2: DNA (Carolina Biological)
4	June 7	June 14	Module 2.3: Genetics
5	June 14	June 21	Module 2.4: Evolution
	June 21	July 5	BREAK
6	July 5	July 12	Module 3.1: Population Ecology
7	July 12	July 19	Module 3.2: Ecological Interactions
8	July 19	July 26	Module 3.3: Human Impact on Global Ecology
9	July 26	Aug. 2	Module 4.1: Overview of Physiology (Carolina Biological)
10	Aug.2	Aug. 9	Module 4.2 (Carolina Biological)
	Aug. 9	Aug. 14	NO LAB

Assessment

In this course there is a total of 11 modules. Because the **first module/week** is an introduction, it won't be assessed the same way as the others. Instead, it will be worth **10 point** of your final grade. The remaining modules/weeks will have the **same weight** and each will be worth **90 points** as explained in the table below. Detailed information will be provided in the instructions of each module, where also, rubrics are provided. To obtain the maximum grade, go over the rubrics before submitting your assignment.

Assessment per module/week

Points

Reading assessment

20

Activity deliverables (worksheets, videos, artifacts). Individual points will be explained in the activity instructions. Rubric provided for each module	40
Collaboration (participation in discussion boards/debates). Rubric provided for each module	30
Total	90

Grading

Your BSC 2005L will be graded based on raw scores from quizzes, worksheets and collaborative posts. Specific assignments are detailed in a point breakdown sheet provided with this syllabus. Quizzes will assess textbook readings, worksheets will assess activities and collaborative posts will assess meaningful learning.

Letter Grade	Point Range (%)
A	≥ 90.0%
A-	≥ 86.7%
B+	≥ 83.3%
B	≥ 80.0%
B-	≥ 76.7%
C+	≥ 73.3%
C	≥ 70.0%
C-	≥ 66.7%
D+	≥ 63.3.0%
D	≥ 60.0%
D-	≥ 56.7%
E	< 56.7%

Technology Considerations

You will create assignments using a wide range of technologies including a word processor, spreadsheets, presentation software, web page editors, scanners, and digital cameras. All assignments will be submitted electronically. You will also participate in reflective discussion via online synchronous and asynchronous communication tools. If you have any problems with canvas please contact canvas IT for help.

Expectations

Each student is solely responsible for reading and following the instructions, guidelines and schedules in this syllabus. Not having read the information in this syllabus will not constitute an excuse for missing an assignment or assessment.

This course is time and place-independent and incorporates a degree of individual choice in assignments and projects, to capitalize on the diversity of experience and prior knowledge of the students; but is not entirely self-paced. Online discussions will be most productive if everyone completes their assignments.

Professional conduct is expected. Know and follow university policy regarding academic honesty. The Student Honor Code is located at <https://sccr.dso.ufl.edu/policies/student-honor-code-student-conduct-code/> (Links to an external site.)

In your online work, follow standards of netiquette: be accountable for what you send, acknowledge online sources you reference. Professional Conduct is necessary to earn an excellent or good grade. For more details of what is expected in the discussion forums, see the instructions for each module.

Reading assignments and activities are due every **Wednesday**. **Please add your activity deliverable in the discussion board by Wednesday too.** The collaborative activities in the discussion board are due every **Friday**. These deadlines will be maintained during the course, unless otherwise noted. There are no excuses for late work. Assignments turned in after midnight will be considered late work. Late work will be penalized 10% of the total points per day past the due date. This applies to both activities and discussion posts deadlines. I will need to know of technical difficulties 6 hours prior to a due date in order to give an extension.

Please contact your instructor if you are unable to complete an assignment, if you have an inquiry regarding your grade or for emergency situations.

Students with disabilities

Students who will require accommodations for a disability must contact the Dean of Students Office of Disability Resources (phone: 352-392-1261). Please see the University of Florida Disability Resources website for more information at: <https://disability.ufl.edu/>. (Links to an external site.) Note that all students should provide documentation of a requirement of accommodation. It is the policy of the University of Florida that the student, not the instructor, is responsible for arranging accommodations when needed.
