

Seminar in Marine Turtle Biology Spring 2015

Graduate students: ZOO6931 section #1C02
Undergraduate students (juniors and seniors only): ZOO4926**

Instructor: Karen Bjorndal
Contact bjorndal@ufl.edu with any questions

Room: 222 Carr Hall

Time: Thursday, period 6

Credits: 1

This seminar course will focus on the current major issues in sea turtle biology, conservation, and management. Each week we will discuss readings, explore recent research, and identify research needs. Readings for class discussions will be both classic papers and recent literature.

Course grade will be based on class participation. Written evaluations of class participation will be provided to each student after the 8th week.

This seminar course will bring together the diverse group of graduate students, advanced undergraduate students, and faculty at the University of Florida with shared interests in marine turtle biology and conservation.

**For undergraduates, registration is under departmental control to ensure that only juniors and seniors register for the course. Please email Karen Bjorndal at Bjorndal@ufl.edu for permission to register.
